A correspondent writes us as follows: A foray was planned into the enemy's country last night, which resulted very soccessfully. For some time, the enemy have been "excursioning it" in large parties, to Bull's Island, distant some five or six miles from this place, making it a depot for runawey negroes and plunder, and a station whence they could be transferred to Illiton Head. Last night, a party of thirty or forty went down, under command of Caplain Kirk, with mull-duars, hopping to secure some "feed for the better." The Yankees, however, had exercised so laudible a prudence that they had all retired to their stronghold on Illiton Head. By slipping rapidly and silently up the bluff, however, they succeeded in astonishing some forty "contrabands," who were politely conducted to the beat, and returned this morning to their lawful owners. Having applied a match to the Corn House (the otton was already burned), and looked in vain for a Yankee physiognomy, they returned to Bluffion, arriving at dawn.

in the judgment of the Secretary, it will be necessary to increase the direct tax so se to produce from the loval States alone a revenue of at least twenty millions of dollars, and to lay such duties on stills and distilled linears, on tebsec, on bank notes, ou carriages, on legacies, on paper whileness of debt and instruments for conveyance of property, and other like subjects of taxitim, as the produce an equal additional ovidences of debt and instruments for couvarance of property, and other like subjects of tax min, as will produce an equal additional sum. The aggregate taxity in will thus amount to tifty millions of dellars.

of property, and other like subjects of tax min, as will produce an equal additional sum. The existing provision for an income tax, just in its principle, inasmuch as it r quires largest continuities in the free property of the Union, springing from the common interest in its preservation, created by the distribution of dellars more. The average at tax tin will thus amount to fifty millions of dollars more that the sum is large, the worner, as he does, no probability that the inverse from ordinary sources will exceed fortry millions of dollars during the current year, and knowing, as be does, that to insert even economized disbursements, and pay the interest on the public debt, and provide a eighing fund for the gradual form interest in its preservation, created by the distribution of its stocks to associations through out the country, as the basis of their circulation. The Secretary entertains the opinion that if a crodic circulation in any form he desirable, it is nived use from ordinary and pay the interest on the public debt, and provide a eighing fund for the gradual forms and pay the interest on the public that it is precised to the attained by a consecration of a portion of them to the public service is priceless. The secretary entertains the opinion of the country, as the basis of their circulation.

The s

by a consecration of a portion of them to the public services is priceless. The real property of the loyal States is valued, in round numbers, at seven and a half thousands of millions; the personal property at three and a half thousands of millions; and the annual surplus cernings of the lyal people at not less than three hundred millions of dollars. Four mills on each dollar, or two-fifths of one per cent, on the real and personal property of the loyal States, will produce firty-four millions of dollars, to which sum the proposed income tax will probably add ten millions. The whole sum will be lit is more than one-sixth of the surplus centings of the country.

He expressed an opinion in favor of this plan with the greater confidence, because it best the advantage of recommendation from experience it is not an unfitted theory. In the State of New ne-sixth of the surplus entnings of the country, crtainly such a tax cunnot be paid without In-novenieuce; doubtless the Legislature which imconvenience; doub'less the Legisla'ura which imposes such a tax must take care that the nonoy thus raised be used economically, prudently, and honselly. But can any one besitate about such or even greater centributions when the Union and the popular institutions which it guards are put in paril by rebellion, and the public faith pladged to our own crizens, who, in many instances, have placed the whole earnings of industrious lives in the hands of the Government for its suppression, asks support?

It will be seen at a glance that the amount to derived from taxation forms but a small portion the sums required for the expenses of the war. I rathe rest, the reliance must be placed on loans Fir the rest, the remained must be praced on loans. He beck leave to refer this uniter altogether to the better judgment of Congresa, suggesting only, that, whatever discretion it may be thought account to give him in a the respects. by thought predent to give him in other respects, the rate of interest he limited by law. Turning now from the more immediate considation of the public finances, the Secretary soli-ts the attention of Congress to some other to-ics connected with the administration of the

Treasury Department.
By the act of Congress of July 13, 1861, commercial intercents with States declared to be in insurrection by the President, was prohibited, and the Secretary of the Treasury was profibled, and the Secretary of the Treasury was authorized to establish such rules and regulations as he might deem expedient, in second nee with which, under license from the President, a restricted under licence from the President, a restricted trade might be conducted. Upon full consideration of the whole subject, it has not been deemed advisable as yet to establish any general rules and regulations for such a trade. In a few instances special licenses have been grunted to convey particular articles of preperty into insurrectionary States, and to carry on a limited trade with parts of Eastern Virginia inhabited by loyal people; but, with the e-inconsiderable exceptions, it has been hitherto thought hee? to enforce the prohibi-

but, with the e incorsiderable exceptions, it has been hitherto thought hesi to enforce the prohibition to the full extent of the act. As the set itself, however, does not seem to contemplate the forfeiture of property unless used for the purposes of the rebellion, or found in transit to or from in urrectionary States, its execution has not been extended beyond that extent.

To avoid, as far as possible, the practical inconveniences of this suppression of commerce, the Secretary, with the approbation of the President, has established regulations, in accordance with which, exton, rice, and other property will be cllected and cared for by ngents of the department in insurrectionary districts occupied by troops of the Union, and will be forwerled by established for secount of the Government, and the proceeds paid

In the State of New ork and in one or more of the other States it count of the Government, and the proceeds paid into the national treasury, subject to any just claims of loyal citizens. This arrangement is, of course, temporary in its nature. As a general rule, in the judgment of the Secretary, commerce should follow the flag; and whonever the authorities of the law in its rully restored in discrete suffice. ion nuder national sanction end for the whele mended by one other consideration, which, in the judgment of the Secretary, is entitled to much influence—It avoids elmost, if not alte-gether, the evel of a great and sudden change in ty of the Union is fully restored in dis ricts suffi-ciently extensive for the re-establisment of loyal State government, affording due security against abuses of trule in furnishing aid and comfort to getner, the evil of a great and sudaen change in the currency by offering inducements in solvent existing justicutions to withdraw the circulation issued under Stete authority, and substitue that provided by the authority of the Union. With a view to reformation of abuses and reduction of expenses, the Secretary has can ed most of the collection districts in all the States transitin from a currency heteroconemus, mequal, and usefa, to one uniform, equal, and safe, may be speedily and almost imperceptibly accomplished.

The Secretary entertains the hope that the plan now submitted, if adopted with the limatations and safeguards which the experience and wishom of Senetors and Representatives will, doubless, suggest, may impart each value and stability to Government securities that it will not be difficult to obtain the additional loans required for the service of the current and the succe fing year at foir and reasonable rates; especially if the public credit he supported by suffices a and certain provision for the payment of interest and the ultimate redemp ion of the principal.

The silver mines of Nevada end Arizonia have also yielded large returns; and the protection of the citizens, from insurrectionary and savage violence, demands the earnest consideration of Congress.

Under the ect of July 27, 1861, large cleims have been presented by the authorized agents of the Governors of several States, for expenses inthe Govarnors of several States, for expenses in-coursed on account of troops raised by them res-pectively, and employed for the suppression of the insurrecier; but as the act authorizing the settlem at of these claims required proper vench-ers in support of them to be thed and passed upon by the accounting efficers, and as no such vouch-ors have, as yet, been furrished, it has been hitherto impracticable to edjust and pay them. years, the experience and skill of naval and miltary officers acquired in its service, and now
available in the operations of the army and cavy,
and the ready aid afforded by it, in ex-minations and survevs of barbors and inlets, to the
forces of the Union in their movements upon the
coast, demonstrate beyond question the wisdom
of the policy which originated and Lassistained
it. The diminished appropriation required for is
support, during the present fiscal year 1860, will
no doubt be cheerfully made.

The number of vessels in the revenue service

no doubt be cheerfully made.
The manher of vessels in the revenue service of the department on the 4th of blanch, 1861, was wenty-ninn. Five had been previously scized by the insurgents, and one had been ordered to Norfolk for repairs, where, having been taken to precess with a view to rebuilding, and therefore incapable of removal, she was involved in the disasters attendant on the destruction of the navy yard.
Of the yessels connected with the revenue ser-

Of the vessels connected with the revenue service not seized by the rebels, four word on the Pacific coast, six on the lakes, and eighteen on the Atlantic coast. Of these on the lakes live have been ordered to service on the Atlantic coast. Nearly half of these vessels are unfit for the purposes of the revenue, and will be sold under the provision of the act of July 25.

Under the same ect three steamers have been purchased and equipped, and have been of essential service in the suppression of unlawful commerce on the Chesspeake, and in aid of the expedicion by which the nuthority of the Union was rightly restored on the eastern shore of Virr cently restored on the eastern shore (1 Vir

To closing this report, the Secretary takes pleasure in asking the consideration of Congress for the various suggestions of the heads of the bureaus of the Department, contained in their eaveral reports, which are herewich transmitted. It has been his endeaver, since assuming the charge of the Department, to infuss into its action the greatest possible activity and vigor, and it is a source of very great satisfaction to him that his effects have been, in coneral, faithfully and zeal-ously supported by the gentlemen with whom he has been usseciated. The reports from the reveral bureaus will show how much her been accomplished during the year, and how we'll. SEIRMINE IN WEARLEY COUNTY, TENN. LOYAL MEX.-We here an interesting latter from Padacah, Ky., from which we learn that there is a report there that the Unlouiste of Weakley county, Tean., hed a fight with the secassionists, a few days ago, on the occasion of the dusting of soldiers at Dresden, and that about tifteen were killed. It is also said that Col. Rogers was concentrating the Union men, who here twalve or tifteen hundred strong, who inteed tighting their way out.

About eighty Teuaessee refugees arrived at Padecah on the night of the 9.h. The whole liee of Tennessee is guarded by pickete to prevent their leaving the State, but they are eluded by taking to the woods until they get under the protecting arms of the troops at Paducah.

THE GREAT WESTPRIN SHIP CANAL. - There is e prespect of much enimated decussion in Coa- Pennsylvania gress and the newspaper press, in reference to the proposition now brought forward, to connect the chain of Northorn lakes with the Mississippl river by a great Ship Canel, and the New York Journai of Commerce says the temporary obstruction of the mouth of the Mississippi by a revolt of the Sonthern States-to say nothing of the possibility that it may again be emberrassed by political disturbances in the interveeing country-prompts the people of the Northwest to speak of this subject with much earnestness. The proposition already considered by the Illinois Legisle'ure, end soon to be brought mere promisently to public notice, coatempiates an Improvement which will permit the largest class of steamboots navigating

Mairivers to pass between Lake Michigan th Mississippi. To attempt a connection of >> Erie with the Ohio is believed to be impracticable, chiefly on account of the impossibility of obtaining an adequate supply of water for cinal purposes. In former years, the "Fox River lasprovement," designed tu coaacct Greea Bay with Lake Michigan, by taking advantage of the partlel facilities for navigation by the Fox and Wisconsin rivers, has received muny warm advocates; but leaving out of view all mere local interests and consulting only the beach's which it may be possible to derive from a great national work, the route from Chicago, by way of the illinois end Michlgan Canal and Hilmeis river, is probably the one entitled to the highest favor. The Des Plaines niver, one of the branches of the Illinois river, approaches within eight miles of Chicago in a southwesterly direction, and a cut to the lake through the in termediate distance la favored by a natural depression which is sometimes overflowed to such

furnished by the constructors of the Illinois end Michigen canal, and a survey of the illinois river, with reference to ite improvement by locks and dams, which give \$15,000,000 es the maximum coet. The Chicogo Fribune says:

There have been such verious opinions given to the public in r 11'ion to the cost of the Summit division of the canul (from Chicago to Lockport), that it may be proper to give the approximate quantiles which would have to be excavated to make a caeal 100 feet wide. wheel river steamers at all points. This project has much to command itsalf to the favor of legislators. The past season we have sees all the channels of trade between the East and the West gorged with grala and merchandise far beyond their capacity, therety enhancing the rules that the agricultural producer had left a eccommodation. Had the New York canels not been remarkably exempt from breaks or other cancer of detention, or had navigation been aarly cicsed by icn, the emberrasement of commerce would have proved most serious. It has been suggested that as a part of the plan for facilitating the movement of produce from the West to ting the movement. incident occurred in the Senate on Thursday last which is worthy of note. Mr. Grimes, in reviewing the finding of the court of inquiry in the case of Cei. Miles, intlmated that he could put no trust in any public man addicted to latemperance. This sentiment called down such a round of applause from the galleries that the Vice President had promptly to rebuke it. There were present which reaches that point. The census of 1850 revealed the fact that dunieg the year which ended June 1, 1850, the quantity of wheat raised in the Ucited States amounted in 100,485,844 husbels. The States which produced the greatest number of busbels were Pennsylvania, Ohio, New York, Virginia, Illinois, Indiane, Michigan, Maryland, Wisconslan, Missouri, Kentucky, North Carclina, Tenuestre, New Jersey, Ilwe, Georgia, end South Carolina. The States above are named la regular in The States above are named la regular dor, the first one, l'empsylvanis, producing larger amount than any other, end so down leader of the quantity produced, as will be seen by the following tabler:

end South Caroline, each over At the time of these returns it will be seen that out of the seventeen States most prodec'ive of wheat eight were slave States; six ere now in rebellion. The amount of corn ralsed in the United States during the same time greatly exceeded that of wheat, the number of bushels being 502,-071, 104, or five times as many.

WHEAT GROWING STATES.

The States which furnish the greatest quantity of wheat were the following, named in the order of their productiveness:

Of these seven ere slave Stetes and only three fies. The Western States, however, during the ten years which have slapsed since the tables ra-ferred to were compiled, bave increased immensely or pepulation and wealth, and, as a consequence, he soil has been brought much more under cultration, and has yielded a greatly increased quantity of grain. We ased refer to crity a few instances to show the extent of the increase. Ohio, as we have shown, produced in the year In the year 1860 the same State produced 28,640, 353, or usarly twice as much. Obio produced i 1850 59 078,695 bushels of Indian corn; la 1860

MINNESOTA. Another iestance to which attention is called is the State of Minnesota, then a territory but sparsely settled and little cultivated. In the pression which is sometimes overflowed to such on extent as to ellow the passage of boats of cossiderable draft; yet, notwithstanding the slight difference in level, the contemplated coencion will involve heavy expenses. A portion of this routh makes nacessary an excavation of ten and a quarter miles through solid rock. The whole length of independent canal which would be necessary would be about fifty miles. Thirty-seven miles of this distance would be between Chicago river and Lake Joliet (an expension of the Des Plaines river), about eleven miles immediately about 00 taws; end the balance in short canale around the dams on the 1988 Plaines and Illinois rivers, in connection with the locks.

The Chicago Tribune, in arging the necessity of the general government engaging in this enterprise (on account of the work heing too formidable far the control of individuals or corporations, and yet essential to the prosperity of the whole country), submits estimates based upon deta furnished by the constructers of the Illinois end Michizen canal, and a survey of the Illinois iver. vation being of the best and most fertile soil.

In the year 1850 the State of Ohio 14 487, 351 hushels of wheat, and 59,078,695 bushels of corn. This quaetity has increased gradually nearly every year, naking ellowence, of course, for thee in which the crops failed all over the country. In 1859 the quantities of grain laised in the State were as follows:

13 345 844 brishels 8 024,251 *** 60,374,043 *** It will be remembered that this year was not a very productive one, the crops falling short of those of other years in some localities. "Although the leaveing of wheat for 1850 extend to be sent of the country of the previous year by Learly eight hundred thousand bushels (704,780), the total receipts of grain—adding flour reduced to bushels—exhibit an increase of only 520,501 bushels ever the year 1858. THE TRENT ATTAIR .- The New York World says the news by the Africa settles the question that there will be no war with England growing out of the seizure of Sidall and Mason by Capt. Wilkes. To be sure, the fuct of their arrest was not known in England when the Africa sailed, but, curiously enough, it was supposed that the miesion of the James Adger in British waters wes the overhenling of the West India mail steamer for the purpose of capturing the rebei emissaries. and in this shape the mattar was brought before the law officers of the crown. Their cpinion is

thus copied into the London journals. It was the opinion of the law officers of the crown that, according to the interpretation of the law as laid down in former decisions, the retions of Britale to the American belli are perheps such that there might have been fair light grounds for the American cruiser seizing the mail steamer as a prize even in Biltish waters, if could have been shown that she knowing'y barbored the persons and property of enemies of the United States in the shape of the delegates and their despatches.
